

ENERFLEX

The Single Source

195 MMSCF/D AMINE SWEETENING PLANT, OMAN

Enerflex's single source solution ensured the project was delivered with outstanding results

PROJECT OVERVIEW AND CHALLENGES

Enerflex was awarded two amine sweetening units of a total of 195 mmscf/d capacity. From concept to commissioning, Enerflex was contracted to carry out all activities related to design, engineering, procurement, co-ordination, fabrication, inspection, testing, painting, shipment, supervision of assembly, erection and commissioning, performance testing, and operations training.

UNIT LOCATION

Lekwair, Oman

ENERFLEX SOLUTION

Enerflex completed this DEP specification compliant amine sweetening plant under budget and on-time. This project was a testament of an increasingly long project experience in the MEA region. By leveraging the Enerflex single source solutions approach, combining reliable and efficient equipment with in-house expertise and demonstrating our knowledge of the regional supply chain, we were capable of completing such a complex project with outstanding results.
