

ENERFLEX

The Single Source

70 MMSCF/D COMPRESSOR PLANT, BAHRAIN

Effective operation and maintenance implementation

PROJECT OVERVIEW AND CHALLENGES

During additional phases of this project, Enerflex had previously supplied six gas compressors under full customer compliance. The equipment for this sour gas compression facility was manufactured in Enerflex's Houston, Texas plant. The company was also awarded the projects operation and maintenance contract that consisted of the six Enerflex supplied gas compressor packages plus liquid pumps, process vessels, piping, control systems, fire alarm system, remote monitoring system, air system, and flare system.

UNIT LOCATION

Awali Gas Field, Bahrain

ENERFLEX SOLUTION

In this phase of this project, Enerflex provided the operation and mainance of the equipment through the use of a skilled local and expat work force, planning software such as Maximo and MS Project, and through the support of Enerflex's global supply chain management to ensure that the correct parts were on-site when needed. Enerflex has a central global contracts management group that monitors plant performance and intervenes to ensure effective maintenance execution and efficient plant operational parameters are implemented.
