

FULL-CYCLE
GLOBAL ENERGY
SOLUTIONS

AFTER-MARKET
SERVICE

ENERFLEX

After-Market Service

Enerflex combines over 40 years of experience overhauling, optimizing, and maintaining compression, processing, refrigeration, and electric power equipment. Our extensive branch network of over 50 locations strategically situated in global energy producing regions allow us to rapidly deploy factory-trained mechanics, spare parts, and components to your field operations quickly and cost-effectively.

Our expert ability to select, optimize, and maintain equipment for your field conditions at every stage of your well's life-cycle is just as reliable – and valuable – as Enerflex's equipment.

We provide installation and comprehensive support for everything we manufacture, and we cover all major brands of compression, processing, refrigeration, and electric power equipment. Our extensive service offering is part of Enerflex's philosophy of integrated turnkey project solutions.

PRODUCT AND SERVICE OFFERINGS

- > Global Platinum Power Packager with GE Waukesha;
- > Exclusive global distributorships and partnerships;
- > Mechanical and electrical service for gas engines, compressors, and electric power generators;
- > Equipment installation and commissioning;
- > Comprehensive after-market support;
- > Field and shop retrofit with complete engineering and design services;
- > Turnkey construction;
- > Preventive maintenance and repair;
- > Field and shop major overhauls;
- > Optimization services;
- > Operations and maintenance; and
- > Extensive parts and engine inventory.

Enerflex's service personnel are experienced, technically proficient, and well-trained. In addition to holding the relevant trade and technical qualifications, our mechanics and technicians complete factory training programs from many of our vendors including Waukesha, Caterpillar, Jenbacher, and Ariel along with in-house training.

**Enerflex provides you
with cost certainty and
confidence in the reliability
of your equipment and facilities up-time,
throughput, product quality, and safety.**

Retrofit Solutions

Enerflex is qualified and equipped to perform complete overhauls and rebuilds of engines, drivers, and compressors, as well as retrofits and modifications to compression, processing, and electric power equipment. In your field or at our facility – Enerflex gives you options.

Operations and Maintenance Solutions

Enerflex will simplify and streamline your asset management processes by getting your new compression or processing facility running smoothly and safely, followed by the responsibility of running the facility for as long as you choose.

Whether it's designing long-term operation and maintenance contracts, maximizing your equipments efficiency under any field production model, or re-packaging one of your natural gas compressors for an exciting new play, Enerflex will reduce the total cost of ownership of your production assets. The Company has the expertise backed by around-the-clock technical resources to deliver single source solutions.

Enerflex's commitment is clear – we help our customers achieve full-cycle reliability and minimize downtime on engines, systems, and facilities.

Trust the **ENERFLEX**
team to help you produce
more hydrocarbons
more cost-effectively
anywhere
in the world.
