ELECTRIC POWER

**ENERFLEX**

# Electric Power Solutions

Enerflex offers a full range of solutions to meet the increasing demands of the power generation market. We supply electric power packages from 20 kW to 50 MW using reciprocating, gas driven engines serving a myriad of installations representing a variety of fuel sources and uses.

Our well-engineered electric power solutions are available in customized options designed to our customer's specific requirements, applications, and environments. Enerflex works with various gaseous fuels, including natural gas, biogas, sewage gas, landfill gas, syngas, solution gas, flare gas, and propane. Enerflex provides a variety of electric power configurations for applications such as island-mode prime power, standby power, fast response peak shaving, and combined heat and power. In addition, we can design permanent installations that provide power during site prep and construction which can then be converted to peaking, and/or backup power after your utility infrastructure is installed.

## ELECTRIC POWER CAPABILITIES AND APPLICATIONS:

- > Equipment-only supply;
- > Complete integrated turnkey solutions;
- > Combined heat and power production;
- > Peak shaving;
- > Remote off-grid island operation;
- > Wide range of fuel-source options; and
- > 24 / 7 support, no matter how remote the location.

Wherever you need self-generated  
or independent power production,  
**Enerflex has a customized  
solution for you.**

We are an experienced in-country operator and a cost-competitive provider with strong vendor relationships required to package reliable, safe, and long-life turnkey power solutions. Our electric power packages are powered by GE Waukesha, GE Jenbacher, Caterpillar, or MAN engines. These engine lines cover the high and low-btu range, and have the ability to run on sub-pipeline-quality gases. Enerflex's expert teams allow for full support, and supply from conception to engineering through manufacturing, installation, commissioning, and operation. This means Enerflex can support your power generation products through the entire life-cycle of your operation.

Enerflex's power generation systems ensure uptime, reliability, efficiency, and safety. We are unmatched in our engineering, component selection, and manufacturing quality. This allows us to be your Single Source for power generation.

# **ENERFLEX**

provides you with cost certainty and confidence in the reliability of your equipment and facilities uptime, efficiency, quality, and safety.
