

FULL-CYCLE
GLOBAL ENERGY
SOLUTIONS

INTEGRATED
TURNKEY PROJECTS

ENERFLEX

Integrated Turnkey Projects

Enerflex's platform delivers a powerful and value-creating array of natural gas infrastructure solutions. Our products and services form a complementary lineup, each element of which strengthens or is strengthened by other elements. The Company's integrated turnkey solution encompasses the initial concepts of your project to expert engineering, design, and manufacturing, as well as installation and commissioning, after-market service, operations and maintenance, and beyond. Enerflex focuses on gas processing facilities, compressor stations, gas pre-treatment for LNG plants, electric power stations, and pipeline facilities.

INTEGRATED TURNKEY PROJECT OFFERINGS

- > Thoroughly engineered, well-built equipment and facilities;
- > Simplified supply chain;
- > Civil, earthworks, and concrete;
- > Piping and structural fabrication;
- > Maintenance of the required equipment;
- > Installation of static and rotating equipment and all other associated modules;
- > Electrical, instrumentation, controls, and automation;
- > Commissioning and full after-market services; and
- > Operations and maintenance contracts.

By working with Enerflex you will receive thoroughly engineered, well-built equipment and facilities, simplified supply chain processes, reduced interface risks, fastest achievable timeline from concept through commissioning, cost certainty, and the confidence that the operating infrastructure will be kept at peak performance throughout its entire life-cycle. **That is Enerflex's Full-Cycle Commitment.**

Our dedicated and sophisticated global enterprise with its extensive product line, skilled workforce, and capabilities provide the

Full-Cycle Global Energy Solution.

The Company has significant global turnkey project experience, including the in-house supply of major compression, processing, and electric power equipment. Enerflex mitigates your risks by meeting HSE requirements at every stage of your project, managing interface risks between disciplines, suppliers, as well as sub-contractors, meeting aggressive schedules and deadlines, dealing with community and governmental relations, and achieving installation standards required for your facility.

Enerflex's promise is to be your single source innovative solutions supplier. Meeting this commitment – not just stating it – is enabled by Enerflex's superb lineup of global resources, all geared to fulfilling the Company's single source vision.

Our state-of-the-art manufacturing facilities, continuously improving processes, extensive expertise in engineering and trades, plus on-the-ground, dedicated teams, and infrastructure allow Enerflex to offer the full turnkey solution.

ENERFLEX helps its customers transform commodities to extract the greatest value from their hydrocarbon stream accurately and safely.
