## **COMPRESSION FACILITY WITH THE CAPACITY TO HANDLE 1MMSM<sup>3</sup>/D FROM 2KGCM<sup>2</sup> TO 75KGCM<sup>2</sup>, ARGENTINA**

**Enerflex wins EPC gas compression plant contract in Neuquén**

### **PROJECT OVERVIEW AND CHALLENGES**

Enerflex was required to provide the engineering, design, procurement, and construction of the equipment for a compression facility with the capacity to handle 1mmsm<sup>3</sup>/d from 2kgcm<sup>2</sup> to 75kgcm<sup>2</sup>.

### **UNIT LOCATION**

**Neuquén Province in the North of Patagonia, Argentina**

### **ENERFLEX SOLUTION**

Enerflex provided five (5) compressors, dehydration system, inlet separator, fuel gas treatment, flare system, and a control system. The units were mounted into a building and the control system was designed to meet SIL 2 requirements. In order to maximize efficiency during construction, most of the piping was pre-fabricated in a shop in Neuquén City using a modular design. Enerflex completed this project on-time and on-budget. This was the first gas compression plant the client contracted to a third party contractor as an EPC project in Neuquén area.
