

ENERFLEX

The Single Source

COMPRESSOR STATION, COLOMBIA

Flexible design allows for future expansion and product requirements

PROJECT OVERVIEW AND CHALLENGES

The equipment design had to accommodate variable operating conditions at the facility and allow for easy expansion to include additional compressors at a later date. The customer needed a reliable compressor station to meet distribution requirements and required a turnkey solution.

UNIT LOCATION

La Creciente, Colombia

ENERFLEX SOLUTION

Enerflex's ability to react quickly to the changing conditions resulted in superior customer service and satisfaction. Enerflex installed three compressors - two operating units and one standby unit capable of immediate startup. The flexible site design made it possible to rapidly install additional equipment to control gas dew point, improve hydrocarbon production and meet gas quality specifications.
