

ENERFLEX

The Single Source

130 MMSCF/D COMPRESSION RENTAL ON A TURNKEY BASIS, OMAN

Exceeded schedule and budget by deploying existing assets

PROJECT OVERVIEW AND CHALLENGES

The customer required Enerflex to reduce flare and achieve early production from additional drilling activities with a design capacity to compress 16 mmscf/d of gas. Enerflex's scope was to supply a rental reciprocating natural gas compressor package.

UNIT LOCATION

Block 9, approximately 100 km east of Ibri, Oman

ENERFLEX SOLUTION

Enerflex provided services for the rental of compression on turnkey basis which included the design, supply, build, operate, maintain and decommission.

The project increased the capacity of the compression plant at the customer's location from 45 mmscf/d to 61 mmscf/d by installing new rental compression packages along with the flare system and utilities. The project was finished on-time, on-budget and resulted in early production and reduced flaring activities for additional production.
